# Global

Supply chain, logistics and transport workforces and enterprises organise and move goods and services around the world

# Vital

Supply chain industry is vital to the Australian economy and our quality of life

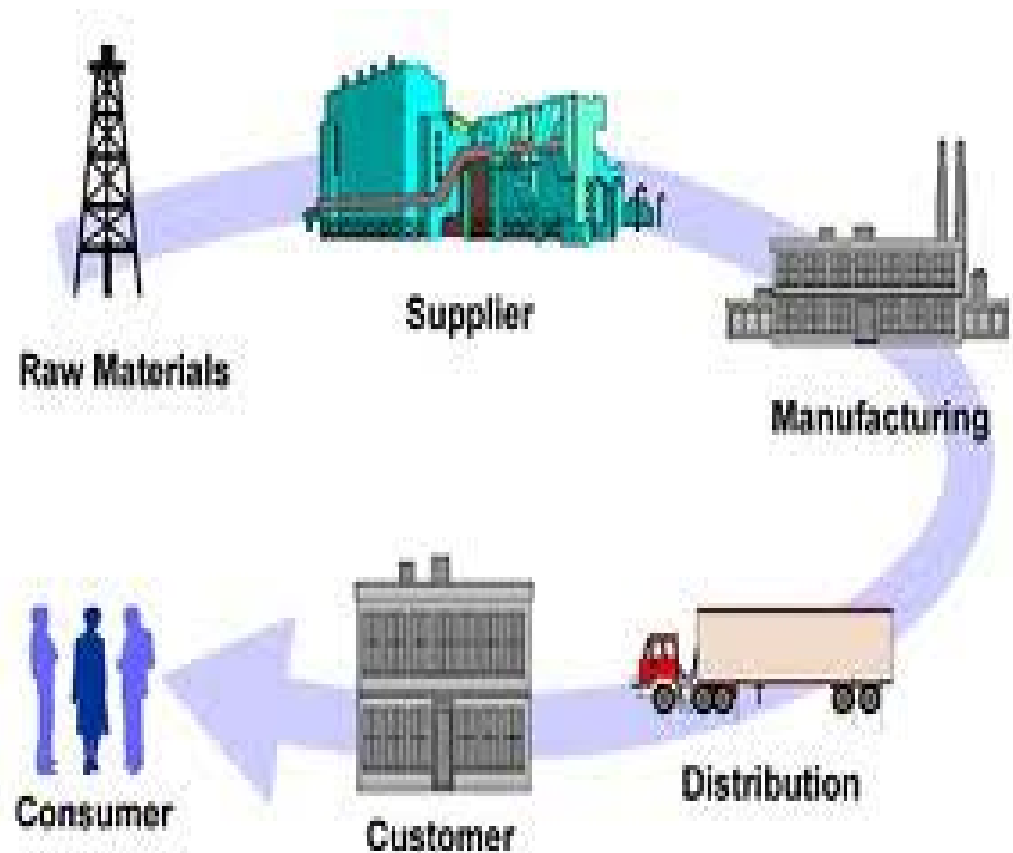

# Vital Facts

- Global logistics industry 13.8 % global GDP (2006) EUR 5.4 trillion (estimate)
- 14.5% to Australia's GDP and 14.7% to Victoria's GSP
- Contributing \$90 billion to the Australian economy annually
- Second largest employer (3.5 million workers in Australia, 500,000 in Victoria)
- Vital to Australia's competitiveness, productivity and economic future
- The west and northern crescent of Melbourne constitute Australia's fastest growing commercial and industrial/freight area

# End to End

Every organisation and enterprise is dependent on supply chains.

This industry manages the movement of goods and services around the world - from the source to the end user and increasingly the disposal or recycling of goods.
